American Society of Sanitary Engineering Receives ANSI Approval on ASSE Standard #1061-2011

Performance Requirements for Push-Fit Fittings

Westlake, Ohio, June 21, 2011 — On June 17, 2011, the American National Standard Institute (ANSI) recognized the American Society of Sanitary Engineering's product standard, ASSE 1061-2011, *Performance Requirements for Push-Fit Fittings*, as an American National Standard. This Standard was approved by ASSE's Board of Directors in April of 2011.

ASSE 1061-2011, a revision of ASSE 1061-2006, was developed to establish the minimum performance requirements for push-fit fittings used as an alternative method of connecting fittings with valves and tubing on potable water distribution systems and hydronic heat systems.

The recently ANSI Approved ASSE 1061-2011 is currently available for purchase, in both electronic and hard copy versions, at the ASSE Webstore (<http://stores.assewebstore.com/>).
